The Mining Equipment Prospector

The 20th WORLD MINING CONGRESS (WMC) & EXPO 2005 in Tehran

Global forum for mining experts from all over the world

- **430 speakers from 32 countries registered so far**
- **Several national pavilions planned**

November 7 to 11 2005 are the dates for the twentieth **World Mining Congress (WMC)** in Tehran, Iran. The event was last held in 2003 in New Delhi. This congress, which started out in 1958, pursues the goal of promoting scientific and technical cooperation and international exchange of knowledge in the mining industry. The WMC is the world´s largest forum for the international mining industry. At this year´s congress 430 speakers from 32 countries will be talking about current themes in the sector. Up to 6,000 experts from over 50 countries are expected to attend. The Iranian National Congress Centre in Tehran is the venue for the World Mining Congress.

Of particular interest to Iranian and international visitors is the **WORLD MINING EXPO 2005**, which takes place in parallel with the WMC. This exhibition, which is to be held on the adjacent Tehran Permanent Fairgrounds, showcases the latest technology in machinery and equipment in the mining industry.

All the leading suppliers from 17 countries are expected to take part in EXPO 2005. Canada, Chile, China, Germany, India, Poland, Russia and South Africa are planning national pavilions.

The range featured at the exhibition spans equipment, technology and services for the acquisition, processing and storage of raw materials and semi-finished products. Plus conveyancing systems, the latest developments in recycling technology, waste disposal, water treatment, air purification, decontamination and cleansing of industrial sites, solutions for environmental problems, monitoring of work processes, storage, storage controls, security and safety at work, the latest developments in protective clothing, breathing equipment, safety belts, warning systems, software and associated services, and further developments in power-generation technology.

Visiting this exhibition will be professionals from the international mining industry and associated institutions, scientists and researchers, government officials, developers of mining technology, trade delegations and buyers.

The World Mining Congress is being organized by:

- International Organizing Committee of the World Mining Congress
- Iranian National Organizing Committee and
- Iran Mine House

WORLD MINING EXPO 2005 is being organized and run by IMAG – Internationaler Messe- und Ausstellungsdienst, of Munich.

IMAG – Internationaler Messe- und Ausstellungsdienst GmbH organizes trade fairs, exhibitions and participations in trade fairs around the world for private and public clients. IMAG is the international arm of the Messe München Group. Since its foundation in 1946, IMAG has been supporting German and international trade and industry on the global markets, with an annual programme that spans around 60 events in over 25 countries. IMAG has been involved in trade fairs in Iran since 1960, and has organized the mining trade fair IRANCONMIN since 1994. For a full listing of IMAG´s events programme, go to:
